

Project Initialization and Planning Phase

Date	01 July 2026
Team ID	XXXXXX
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A TA/Instructor	Efficiently triage student emails and provide empathetic, targeted academic intervention.	I spend significant time manually reading messages to guess student emotions and craft the right tone.	Slow response cycles can cause me to miss or delay helping students who are severely struggling.	Overwhelmed by the administrative bottleneck and anxious about missing critical student needs.
PS-2	Support Team	Maintain consistent empathy and high-quality response standards across a high volume of student inquiries.	Evaluating mixed student emotions accurately across different text inputs is highly subjective and lacks transparency.	We lack an automated, reliable way (like a dual-model comparison system) to instantly classify student sentiment and generate field-specific replies.	Frustrated by operational inefficiencies and concerned about inconsistent support quality.
PS-3	Self-Study Learner	Get quick, empathetic guidance and rapid	Manually searching forums or drafting help	Traditional platforms don't offer immediate,	Lost, confused, and discouraged during independent

		clarification when I get stuck on complex topics like recursion.	requests takes too much time and fails to capture my specific confusion.	emotion- aware tips or track my historical progress to help me self- reflect.	study blocks.
