

Project Initialization and Planning Phase

Date	02 July 2026
Team ID	xxxxxx
Project Title	Emotion Detection & Learning Support Engine
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	The primary objective is to assist users by analyzing their emotions and providing the tips and suggestions for learning the topic.
Scope	The project comprehensively analyses the emotions of the user through the input prompt identifies their emotions and provides requested data about the topic using two models BiLSM or BERT
Problem Statement	
Description	Many professionals, staffs, training assistants, students struggle to find proper answer for their problem eventually leading the user to develop ignorance about that topic.
Impact	Solving these issues will result in improved understanding of the topic, boosts confidence in the user, user can themselves analyse their emotions.
Proposed Solution	
Approach	Employ Artificial Intelligence, Natural Language Processing (NLP), Gemini API, and Streamlit to analyze event information, detect emotions and generate personalized conversation.
Key Features	- AI-based emotion analysis and topic detection. - Personalized conversation and tips to learn the topic.

	- Fact verification using Gemini API. - Emotion and Conversation history tracking. - Interactive Streamlit Interface.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	Intel Core i5 Processor, T4 GPU
Memory	RAM specifications	8 GB
Storage	Disk space for data, models, and logs	256 GB SSD
Software		
Frameworks	Python frameworks	GeminiAPI, Streamlit
Libraries	Additional libraries	scikit-learn, pandas, numpy, matplotlib, seaborn
Development Environment	IDE	VS Code
Data		
Data	Source, size, format	Kaggle dataset
