

Team Involvement in Demonstration

Date	05 July 2026
Team ID	xxxxxx
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	1 Mark

Team Involvement in Demonstration:

This document records the active participation and roles of each team member during the project demonstration. It ensures that every member contributes meaningfully to the presentation and that responsibilities are distributed fairly and clearly.

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation
1	Tithi Goswami	Team Leader & Developer	Introduction & Problem Statement	Explained educational stress context, project goals, and rule-based keyword boosting.	Active
2	Tithi Goswami	AI/ML Developer	Model Architecture (BiLSTM + BERT)	Demonstrated tokenization pipelines, model loading (@st.cache_resource), and emotion classification.	Active
3	Tithi Goswami	Backend Developer	Generative Guidance Integration	Showcased Gemini API framework integration and real-time coping strategy output loops.	Active
4	Tithi Goswami	Frontend Developer	Streamlit UI Navigation	Demonstrated multi-tab dashboard view, dynamic Plotly bar charts, and user input areas.	Active
5	Tithi Goswami	QA Engineer	Testing & Validation	Presented the 60-iteration Postman stress test runner results and session-state latency fixes.	Active
6	Tithi Goswami	Documentation & Git Lead	Analytics Dashboard & Future Roadmap	Demonstrated historical stress logs, GitHub repository management, and future multi-modal scope.	Active

Team Coordination Notes:

Aspect	Details
Team Leader / Coordinator	TITHI GOSWAMI
Overall Team Coordination Rating (1-5)	5/5
Any issues during demo	Cold-start CPU latency and API looping lag during initial testing cycles.
How issues were resolved	Implemented resource caching hooks and locked the generative text output into st.session_state to decouple API invocation loops.
